

MOBILE APP FOR YOUR SECURITY SYSTEM

Do you have an alarm system but are not sure, what is happening at your home or office?

Be informed and control your security with Protegeus app

PROTEGUS APP WILL WORK WITH ANY ALARM SYSTEM
CONNECTED WITH "TRIKDIS" COMMUNICATOR

WITH PROTEGUS APP:

Know when your family comes home

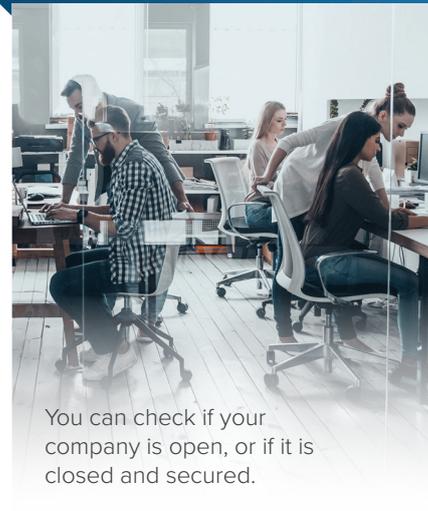

See the alarm system status

...and turn it on when needed

Useful for business

You can check if your company is open, or if it is closed and secured.

FEATURES:

Smart notifications

You will know who and when armed or disarmed the alarm system at home or in the office. You will also see the alarm system's status. You can choose which notifications you want to receive. Protegus keeps a full 3-month events' history, which can be downloaded.

Remote alarm system arm and disarm

With Protegus you can arm and disarm the alarm system remotely. It works with all security systems (old and new), after connecting a TRIKDIS communicator.

Control connected devices

Control lights, gates, air conditioners, heating, watering, and other equipment.

Temperature monitoring

With an additional device, you can monitor the temperature and get "push" notifications if it exceeds the set limits.

Invitations your family and colleagues

You will be able to invite other users to receive event notifications and control the alarm system. When needed, you can provide a temporary access to the system for installer.

HOW TO START?

Contact your security company or installer.

They will connect and configure the **TRIKDIS communicator** with your alarm system
